Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1-6 are allowable over the prior art of record because the prior art of record does not teach or suggest the entire combination of elements of the hose reel device set forth including a casing having a box received therein and a mandrel located in the box, a side plate connected to an end of the box and having a shaft extending from an inside of the side plate, a coil spring mounted to the shaft; a transmission gear set located between the box and the side plate and including a first gear co-axially connected to an axle of the mandrel, a second gear co-axially connected to the coil spring and engaged with the first gear, a resistance gear set being engaged with the first gear and including a clutch member which disengages the rotational movement of the first gear from the resistance gear set when pulling the hose, and connects the rotational movement of the first gear to the resistance gear set when retrieving the hose. None of the references of the prior art teach or suggest the combination of elements as advanced above and such do not provide the necessary motivation, absent applicant's specification, for modifying the hose reel device in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
